Greg,

I have a call in to Chris this morning to ask him what he needs. I will loop back with you as soon as I have a better idea, but wanted to get you the latest info as soon as I had it.

Thanks for ORD's incredible support on this.

Becki Clark, Deputy Director
Office of Ground Water and Drinking Water

Hi Becki - Maybe we should talk about what you would like us to do to support Chris? I'm not clear on what he exactly needs.

Greg

Folks,

Heads-up - attached are more data from Freedom Industries. There are potentially more chemicals in the mix.

Can you all please take a look at this? I haven't had a chance to read it yet myself.

Thanks; this continues to be a dynamic situation.

Becki Clark, Deputy Director

Subject: PPH: The saga continues

Becki,

Attached is the latest MSDS provided to CDC by Freedom Industries. It appears as if the mixture is a bit more complex than previously indicated. The state is having difficulty getting the reporting limit for "PPH" below the ppm level and is seeking support from Federal "partners".

Chris
